EDUCATION

- **Simon Fraser University** — Burnaby, British Columbia
  Bachelors of Science - BSc, Computer Science — *Sept 2018 - December 2023*

SKILLS SUMMARY

- **Languages/Markup:** JavaScript, TypeScript, Ruby, Python, SQL, HTML/CSS, some C/C++/Java
- **Frameworks:** Ruby on Rails, VueJS, ReactJS, NextJS, EmberJS, ExpressJS, NodeJS, Sidekiq, Mocha, Chai
- **General/Tools:** Docker, GCP, PostgresSQL, GraphQL, TailwindCSS, Git, Agile, Prisma, JIRA, Figma

EXPERIENCE

- **Fresh Prep - Fullstack Developer** — Vancouver, B.C.
  Incoming Full-Time — *April 2024*

- **Fresh Prep - Fullstack Developer Intern** — Vancouver, B.C.
  Docker, Ruby, TypeScript, Ruby on Rails, GCP, Vue.js, Sidekiq, PostgresSQL, RSpec, CircleCI, Figma — *Sept 2023 - Current*

  - Lead efforts on implementing internationalization (i18n) for our Vue.js/Rails monolith, enhancing accessibility for a diverse user base across 3500+ unique products.
  - Introduced Contentful to streamline content management, empowering marketing teams to efficiently control and schedule content updates aligning with various promotional offers and marketing strategies.
  - Integrated a tailored loyalty platform seamlessly into the application, enabling frequent users to unlock substantial savings and increasing customer retention through targeted rewards and incentives.

- **Later - Frontend Developer Intern** — Vancouver, B.C.
  JavaScript, TypeScript, HandlebarsJS, EmberJS, Ember-Qunit, CircleCI, JIRA, Figma — *Sept 2022 - December 2022*

  - Developed and deployed the 'Archive Campaign' feature, improving brand organization by allowing seamless movement of campaigns between Public, Private, and Archived states.
  - Leveraged EmberJS and TypeScript to develop features within the Creator/Brand domain - utilized various components of Ember Octane including controllers, services, routes, adapters, engines, serializers, and more.
  - Collaborated with QA, UI/UX, and other Frontend Development team members to close over 40 tickets, ensuring smooth functionality and high-quality user experiences.

- **PixlWorks Productions - Software Developer Intern** — Vancouver, B.C.
  JavaScript, HTML/CSS, ReactJS, NodeJS, Express, Heroku, GraphQL, graphql-request, axios — *January 2022 - April 2022*

  - Developed a full-stack software solution to tackle PixlWorks' growing bottleneck relating to the main service they provide to customers. Increased customer capacity from the previous limit of 200 to over 10k (5000% growth).
  - Implemented business logic using a NodeJS/Express backend and wrote mutations/queries for a GraphQL API being consumed by the application.

PROJECTS

- **RateMyClass.io**
  TypeScript, NextJS, Next-Auth, Prisma, Zod, ChartJS, RDS PostgresSQL, TailWindCSS, Figma — *Nov 2022 - April 2023*

  - Created an informational hub for university and college students, facilitating class rating and review exchanges among peers and building a database of student ratings for reliable academic insights.
  - Employed NextJS's app router, flexible client/server rendering, and serverless functions to streamline the build process and optimize application performance.
